## University of Dayton

### Consultant Update - Envision Strategies

The on-line Dining Services survey was launched between February 16 and March 2. Envision received 967 completed surveys - a very strong response from the University of Dayton community! The results will be used to guide the development of dining strategies that can plug into the various schemes being considered for the overall campus master plan. In addition, the UD Dining Services will be analyzing this information to assess the need for program changes such as locations, hours of service and possible renovations that may be made in the near future.
