Consultant Update - Walker Parking

July 27, 2007

Since presenting an interim report of findings to the CMP Steering Committee, Walker continues to examine specific parking issues revealed by Burt Hill's focus groups and interviews. Walker is working with Burt Hill to coordinate and review traffic and parking patterns and alternatives with each planning solution during the design process. Walker is also evaluating appropriate automobile alternatives, and will provide recommendations for increasing the use of shuttle transit, ride sharing, and bicycle transportation.
